

Super Stationmaster™ Omni Fiberglass Antenna, 460-470, 12.1dBi, N Female

Product Description

These Super Stationmaster UHF base station antennas incorporate design enhancements not normally available in other fiberglass collinear antennas of comparable size. Due to their broadband characteristics, only six versions are required to cover the 450-512 MHz band. The 455 combines full 10 MHz bandwidth capability and improved lightning protection with 10 dBd omni-directional gain while preserving the desirable light-weight characteristic found in all Stationmaster antennas.

**Features/Benefits**

- Fiberglass construction protects radiating elements in corrosive environments.
- Copper radiating elements minimize possibility of intermod generation.
- Full 10 dB gain – provides maximum on horizon coverage.
