

SERIES 9800 MARINE INTERCOM SYSTEM

A premium headset intercom solution designed for the demanding requirements of high-noise performance boat environments

WWW.DAVIDCLARK.COM/MARINE

SERIES 9800 MARINE INTERCOM SYSTEM

The Series 9800 Marine Intercom System from the David Clark Company Incorporated is built for **ALL** demanding marine environments.

The Series 9800 is a rugged, water-tight intercom system that provides clear intercom and radio communication solutions for the high-noise environments of the "go fast" and high performance racing as well as recreational and work boats.

The system includes features such as:

- Accommodates up to six crew members on intercom
- Full duplex voice activated intercom communication
- Ability to connect two radios with split audio capability (left ear Radio 1, right ear Radio 2 receive) and is compatible with most marine, mobile, VHF and UHF band radios
- Expandable to five radios with optional Multi-Radio Interface Module
- AUX-IN connection for stereo music input. Automatic mute during Radio 1 or Radio 2 transmit/receive
- Power input range 11-30 VDC
- Corrosion-resistant, weather tight shielded enclosure for increased durability
- Cell phone adapters

9800 SYSTEM MARINE HEADSETS INCLUDE THE FOLLOWING FEATURES:

- Extremely durable and reliable
- Behind-the-head or Over-the-head styles (Low tension fit for added comfort)
- Corrosion-resistant stainless steel hardware
- 8-foot coil cord length (extended)
- Water-tight quick disconnect-type connectors with heavy-duty strain relief
- Wired for stereo with dual volume control for left or right side adjustment
- Undercut Comfort-Gel Ear Seals provide unsurpassed comfort
- Water-resistant noise-cancelling microphone (Dynamic M-87)
- Certified Noise Reduction Rating of 23dB

Headsets Covered by 1 Year Warranty.

BODY SWITCH PROVIDES INTERCOM AND RADIO TRANSMIT CAPABILITY FOR SERIES 9800 HEADSETS

U9810BS BODY SWITCHES

The U9810BS Body Switches have been specifically designed for harsh marine weather. (The housing is water-tight and RFI-shielded, for superior resistance to the elements.) The unit has keyed water-tight connectors with high cycle rates for simplified and long-lasting operation. The large pushbutton switch can be conveniently located and easily activated at high speeds. Heavy-duty 15-foot (extended) coil cord allows greater user mobility.

U9811BS BODY SWITCH WITH PERSONAL COMMUNICATOR PORT

Provides cell phone interface for individual crew member and/or passenger connection.

U9810BS/ U9811BS Body Switch Covered by 1 Year Warranty.

U9810PD PANEL DISPLAY

The Series 9800 Panel Display is a user friendly interface for the system. The easy-to-read LCD display and toggle up/down arrows allow the user to toggle through the control settings and modify listen levels, microphone sensitivity, and display brightness. The result is a customized intercom and audio system that enhances the boating experience.

U9810PD Panel Display Covered by 5 Year Warranty.

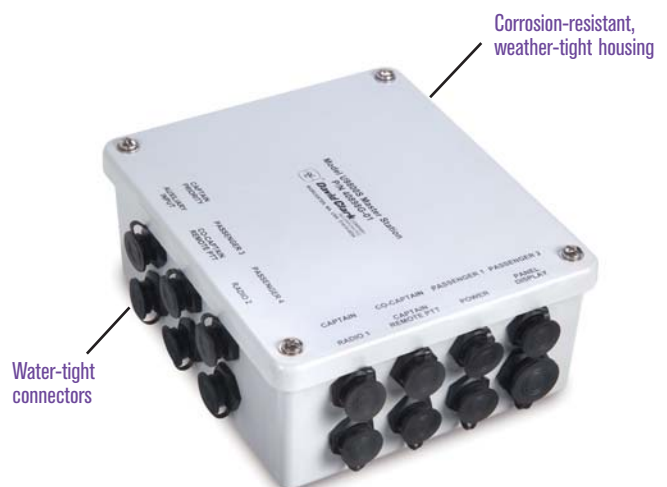

THE MASTER STATION

U9800S MASTER STATION

The U9800S Master Station is used with the Model U9810PD Panel Display and the Series 9800 Noise-Reducing Headsets to provide clear intercom communications for up to six crew members and/or passengers, two of which have the ability to radio transmit. Compatible with most mobile VHF, UHF and marine band radios, with the ability to connect up to six cellular phones. The unit has a Split Audio feature, which enables the user to hear one radio in one ear and a second radio in the other ear. In addition, the entire system has a connection for CD, stereo sources, etc. Rugged, corrosion-resistant housing and weather-tight for long lasting operations. Plug and play architecture - easy to retrofit. No harness required.

U9800S Master Station Covered by 5 Year Warranty.

MARINE CABLES

C98-20PW POWER CABLE

The Power Cable for the 9800 System comes in a 20-foot length with a connector on one end and tinned leads on the other end. The Power Cable provides power for the system to function.

C98-20PD PANEL DISPLAY CABLE

The Panel Display Cable for the 9800 System comes in a 20-foot length with a plug and play type connector on both ends and connects the Panel Display to the communication system.

C98-20RD RADIO CABLE

The Radio Cable for the 9800 System comes in a 20-foot length with a connector on one end and tinned leads on the other end. The Radio Cable allows a mobile radio source to be connected to the system and distributed across the entire communication system. Up to two radio sources can be connected to a system expandable to five radios with optional Multi-Radio Interface Module.

*Note: Plug and play cables are available for some radio models. Contact factory for details.

C98-20AX AUXILIARY CABLE

The Auxiliary Cable for the 9800 System comes in a 20-foot length with a connector on one end and 3.5mm or RCA Jack Connections on the other. This allows a stereo-type source (i.e. CD player, iPod, Mp3) to be connected to the communication system.

*Note: Music sources are muted whenever Radio 1 or 2 is in transmit/receive mode.

SYSTEM CABLES

System cables are available in both in-line and panel mount versions. In-line cables are complete assemblies and include through-hull fitting for simplified installation. Panel mount cables provide a black, stainless steel faceplate that can be mounted to most common boat surfaces. In-line cables are available in lengths from 10 to 30-feet with keyed connectors on both ends for plug and play installation. A 50-foot version can be ordered for longer or custom lengths. It has a connector on one end and a connector kit that the installer can add upon desired length.

Panel mount cables are available in 10, 20 and 30-foot lengths with keyed connectors on both ends for plug and play installation.

System Cables – In-Line

- C98-10LN System Cable in 10-foot length
- C98-15LN System Cable in 15-foot length
- C98-20LN System Cable in 20-foot length
- C98-25LN System Cable in 25-foot length
- C98-30LN System Cable in 30-foot length
- C98-50LN System Cable in 50-foot length

System Cables – Panel Mount

- C98-10PN System Cable in 10-foot length
- C98-20PN System Cable in 20-foot length
- C98-30PN System Cable in 30-foot length

Misc. Cables –

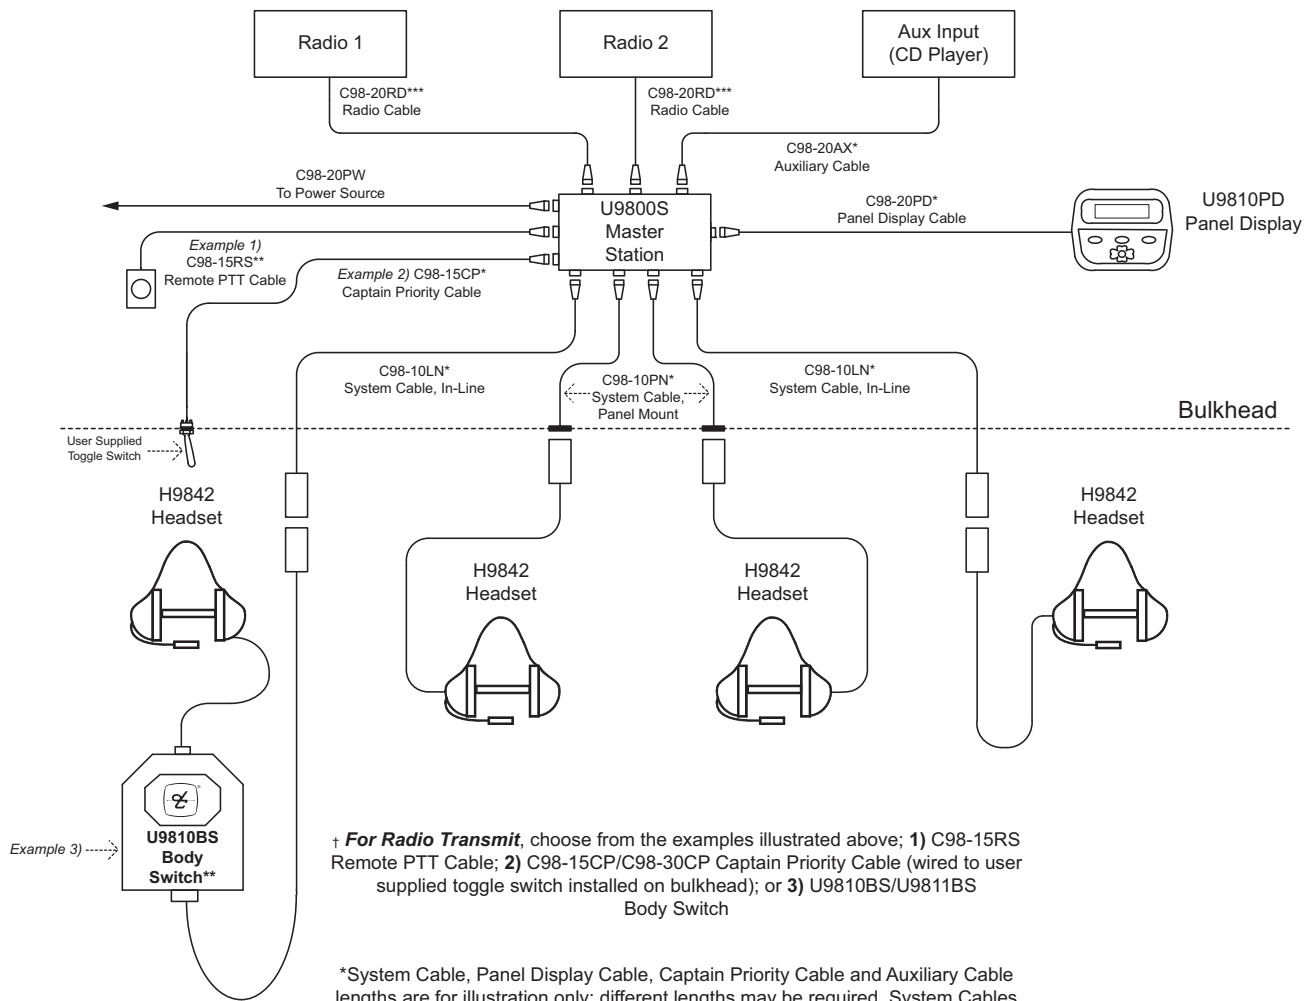

- C98-15CP Cable ASY, 2 Cond, Multi Use in 15-foot length
- C98-15EX 15-foot Extension Coil Cord
- C98-30CP 30-foot Captains Priority Cable
- C98-15RS 15-foot Remote PTT Switch
- C98-30AX 30-foot Auxiliary Cable Assembly

Marine Cables Covered by 1 Year Warranty.

SERIES 9800 MARINE SYSTEM

4 - POSITION CONFIGURATION

† **For Radio Transmit**, choose from the examples illustrated above; 1) C98-15RS Remote PTT Cable; 2) C98-15CP/C98-30CP Captain Priority Cable (wired to user supplied toggle switch installed on bulkhead); or 3) U9810BS/U9811BS Body Switch

*System Cable, Panel Display Cable, Captain Priority Cable and Auxiliary Cable lengths are for illustration only; different lengths may be required. System Cables available in either in-line (-LN) or panel-mount (-PN) configuration. Number after dash indicates length in feet.

**Alternate Body Switch U9811BS provides cell phone or portable radio interface for individual crew member connection (in conjunction with C9801CL or C9803CL cell phone cords), in addition to Radio PTT functionality.

***C98-20RD is a universal radio cable. Direct interface radio cables are available for some models. Please contact factory for details. If adapting to a Motorola Syntor X9000, Spectra, Maratrac w/A7 heads or XTL series (except with -05 heads), add part numbers 40107G-01 and 09227P-81 (one each, per radio).

System available in 2 through 6 person configurations
