

# POWER MAX

POWERMAX CHARGERS

## PMBC SERIES

- PowerMax PMBC Power Supply/Battery Chargers provide clean and reliable power for charging and maintaining battery state-of-charge during service reflash, complex maintenance, and in the showroom where vehicle demonstrations can require significant power from the battery.
- Allows for vehicles to be displayed with all electrical features and accessories activated
- Great for maintaining the battery
- Provides a constant clean power supply for using scan tools and reprogramming of ECMs without discharging battery
- Automatically maintains the battery when performing complex mechanical service
- Advanced switch-mode design
- Provides a cleaner, more reliable power source than a standard charger
- Fully regulated DC output prevents overcharging of the battery and provides precise control to maintain the necessary battery voltage during complex service and reflash
- Quiet, small, and compact for portability
- 2 year Standard Warranty
- Multiple protection features for a long, trouble-free life
- Reverse battery polarity protection via replaceable fuses
- Brownout input protection
- Over-current protection: cycle-by-cycle peak-limiting as well as rated current-limiting to maximize the life of the converter
- Over-temperature protection
- High quality, detachable cables for easy field service

#### PMBC-32,45,55,75 Specifications and Options:

- Power Supply Voltage Regulation: 13.6V
- Maximum Amps Output at Regulated Voltage: 32-75A
- On/Off Switch:
- Removable Cable Set: 6 foot clamp set
- Easy Grip Handle
- Rubber Mounting Feet
- 3 Stage Charging with a top voltage of 14.6
