

SVR 252 Full Duplex Repeater

FULL DUPLEX REPEATER

DEPLOYABLE OR FIXED CONFIGURATION

COST EFFECTIVE

- ▲ PC Programmable Full Duplex Repeater
- ▲ VHF/UHF/700/800/900 MHz
- ▲ CTCSS and DCS
- ▲ 2 Watt Transmit Power Output
- ▲ Optional Duplexer, Housing and Power Supply for Tactical Deployment

SVR 252 Full Duplex Repeater (Shown with optional PS 252 and Duplexer)

The popular SVR-250 is now available in a **full duplex version** with many of the same features as the original. The SVR-252 is **PC programmable** on a per channel basis for frequency, tone/code, wide/narrow band operation and emergency operation. In addition, the SVR-252 is **full duplex**, which allows **extended coverage** from **portable to portable** as well as **portable to base** communications. Full duplex operation eliminates the "sampling" normally heard during base to portable transmissions.

The SVR-252 can be used as **standalone repeater** in a command vehicle application to improve on-scene portable coverage. It is also available in a standard enclosure with a duplexer and DC power supply for **rapid deployment** in

emergency and interoperability applications. (As pictured: SVR-PS252)

When powered off of 110VAC, the Auxiliary DC terminals can be used as a **back-up battery input**, or used as a convenient **DC trickle charger/power** supply (Max current: 2 amps)

The SVR-252 can interface to analog or P25 digital mobile radios. The SVR-252 can also interface to conventional or trunking mobiles and is **capable of operating with SkyTerra (formally MSV) mobile satellite phones**. In trunking mode, the SVR-252 ensures proper acquisition of the trunking status information.

The SVR-PS252 is a rapid deployment, cost-effective solution for **on-scene portable to portable communications**.
